

## THREE Webasto Products for new DayVan from Auto Campers

**The all new Ford Transit-based Auto Campers DayVan series marks a welcome return to the original essence of motorised camping, but with all the benefits of today's most sought-after creature comforts.**

Available in Classic, Trend and Limited trim levels, the DayVan is the first UK production series to include Webasto's innovative X100 diesel hob as standard across the whole range, the Webasto Air Top 2000 blown air interior heating system is an option and the Webasto Hollandia 300 sun roof is a standard feature on Limited models and optional on all others.

Designed with outdoor pursuits enthusiasts in mind, each DayVan includes 2 beds and 4/5 travel seats. In DayVan form the original low roof is retained, to provide the driving convenience of an everyday vehicle, with a LeisureVan alternative featuring a medium roof with standing height inside, but both versions will take heavy duty roof racks to carry kayaks or bulky luggage.

All furniture, which is positioned on one side to make the most of the Transit's exceptional interior capacity, is an industry first by being constructed in high quality polypropylene and stainless steel. Operation of the X100 hob is accessible from inside or outside and the fridge is mounted on runners to create a unique socialising/picnic area outside.

Managing Director, Steve Wood, has led his own team with the strong support of specialist suppliers to create the concept and is delighted with the finished result, and said: "DayVan has been designed to offer innovation, quality and value. In Classic Trim the range starts from just £24,995, which is really excellent value for money. I'd like to thank Webasto for their assistance in creating such a special range of vehicles, their helpful, knowledgeable and superbly personal service has been very much appreciated throughout the whole process of turning an exciting idea into an elegant reality."
